Bodyshape^{V2}

Fitness devices engineered to revolutionize your workout experience. Innovative combination of vacuum massage and therapeutic infrared heat, this device accelerates fat loss, strengthens muscles, and supports comprehensive fitness development, providing an efficient way to achieve your fitness goals.

Touch screen size

13.3^{-inch}

The Bodyshape^{V2} device enhances your fitness with infrared heat technology for efficient calorie burning. Combined with vacuum therapy, it targets stubborn areas, accelerates fat loss, boosts circulation, and reduces cellulite. Enjoy immersive workouts in virtual landscapes, running through iconic locations like Los Angeles, Venice, and more for a motivating experience.

Bodyshape Horizontal^{V2}

The redesigned Bodyshape Horizontal V2, now in a more compact form, is a premium recumbent bike offering a low-impact, joint-friendly cycling experience. It features an adjustable backrest, infrared heat, vacuum technology, collagen lamp, and therapies like chromotherapy and aromatherapy.

Applications

NETFLIX

Adjustable pedals and a large touchscreen, it ensures a personalized, comfortable ride, enhanced by high-quality audio for an immersive experience.

Bodyshape Horizontal

- Infrared IR
- Underpressure
- Collagen lamp
- Aromatherapy

Recumbent bicycle that allows cycling while lying down, reducing joint strain.

It is equipped with a large touch screen display and a high-quality audio system. It features a luxurious leather-finished backrest with electric adjustment, underpressure vacuum, infrared heating, a collagen lamp, chromotherapy, aromatherapy, and more. The pedals are adjustable for distance, ensuring a personalized and comfortable experience for patients of all heights.

Applications

NETFLIX

Activshape Pilates

The **Activshape Pilates Capsule** combines traditional mat Pilates with the benefits of hot Pilates, designed to stretch, strengthen, and sculpt your body while boosting cardiovascular and lymphatic health. Heated to 36.6°C (100°F) for optimal body shaping and rehabilitation, it also features Infrared (IR) technology and red light therapy to enhance detoxification, improve circulation, and accelerate muscle recovery.

PEMF Bed

Discover the VA Longevity Bed, an advanced system designed to restore your body and mind through the power of five cutting-edge therapies.

Combining PEMF, Far Infrared, Red Light, Vibroacoustic, and Hot Gemstone treatments, this bed helps you recharge on a cellular level, reduce stress, and accelerate recovery.

Far Infrared Therapy – penetrates deep into tissues to relieve tension and improve circulation.

PEMF Therapy – mimics Earth’s natural frequencies to boost recovery and reduce inflammation. **Red Light Therapy** – stimulates collagen and supports skin regeneration. **Vibroacoustic Therapy** – sound vibrations calm the nervous system and improve sleep quality. **Hot Gemstone Therapy** – grounding heat to melt tension and restore balance.

Red Couch 360

The Red Couch 360 is an advanced wellness device that integrates red light therapy, massage, and heat. It utilizes non-invasive wavelengths of red and near-infrared light to promote cellular health, aiding in the relief of various conditions. This therapy is particularly effective in accelerating joint recovery, reducing pain, and supporting muscle and tissue repair, making it an excellent choice for treating sports injuries, neck and shoulder stiffness, sore backs, and other muscular discomforts.

VA Body Sculpt

The device uses advanced **High-Intensity Focused Electromagnetic (HIFEM) technology** to induce sustained, maximum muscle contractions, far exceeding the power and frequency of regular workouts. This leads to rapid, natural muscle build-up without pathological hypertrophy, achieving results faster than traditional exercises. VA Body Sculpt builds muscles more effectively than any other training method.

Effects confirmed by numerous research results.

Cryo Total

An advanced full-body cold therapy device, using liquid nitrogen to reach temperatures as low as -220°F/ -140°C.

Designed for rapid recovery and wellness, it reduces inflammation, improves circulation, boosts energy, and enhances mental clarity. An electric window allows for customizable settings to meet individual needs. Ideal for athletes and wellness enthusiasts, it provides a safe, controlled environment for short, effective sessions.

Activ Cryo^{V2}

A state-of-the-art cryo chamber designed for cryotherapy sessions at temperatures as low as **-180°C / -292°F**. It features a large patient touch screen, an operator's remote control tablet, thermovision, and an efficient nozzle system for even temperature distribution. The cabin door includes a large, durable glass window for easy monitoring of the cooling process and treatment.

**Extremely low
Temperature**

-292°F

Enhanced with LED backlighting and constructed from premium materials that are resistant to moisture and low temperatures, this cryosauna's interior provides an exceptional aesthetic, making it an attractive addition to any studio or clinic.

Cryo Local Polar Bear

Local cryotherapy is very popular in cosmetology, dermatology, traumatology and sports medicine.

The device uses steam, cooled by nitrogen gas, to target and cool specific areas of the skin, offering various health benefits.

The unit can be used conveniently in health clinics, beauty salons, sports clubs, and fitness wellness centers. Presented device is a great complement to the offer for cryotherapy treatments.

Local Cryo also called Cryo Facial is a non-invasive, painless facial treatments where cooling your skin using vaporized liquid nitrogen.

Cooling skin to low temperatures will allow your skin to contract while speeding

up the microcirculation process. As well as this cryo facial session will increase collagen production and to promote skin rejuvenation.

Extremely low Temperature

-256°F

Cryo Flow

Cryo Flow delivers localized cryotherapy at temperatures as low as -30°C / -22°F without the need for liquid nitrogen. This innovative system offers a fast and user-friendly experience, with treatment sessions lasting between one to five minutes, depending on the targeted area.

Featuring a high-performance compressor, Cryo Flow rapidly cools the air, minimizing preparation time. Its advanced cryogenic container and hose ensure the air remains colder for extended periods, outperforming other machines in the market.

 **100% Electric cryotherapy**

Cryo Flow + Face LED therapy for beauty and slimming

The treatment begins by cooling the face and neck with a controlled stream of vaporized cold air delivered by our advanced Cryo Flow machine. This is followed by an LED light therapy session designed to enhance collagen production and amplify anti-aging effects.

Our LED therapy facial utilizes six different colors of LED light, each with specific wavelengths tailored to address various skin concerns, helping to restore a youthful and radiant appearance.

Cryo Flow Mini

The Cryo Flow Mini, with its compact design, offers localized cryotherapy at temperatures reaching -20°C / -4°F , eliminating the need for liquid nitrogen. This sophisticated device is crafted to deliver a swift and smooth user experience, with treatment durations customizable.

Optimized for efficiency, the Cryo Flow Mini is equipped with a high-performance compressor that ensures rapid air cooling, minimizing setup time. Its advanced cryogenic container and hose are meticulously designed to sustain lower temperatures for extended periods, providing performance that surpasses other devices in its class.

The Cryo Flow Mini also offers the option of integrating an LED therapy facial mask, positioning it as a versatile solution for the beauty industry. This advanced mask employs six distinct colors of LED light, each designed with specific wavelengths to target and treat various skin concerns. The LED therapy not only enhances skin rejuvenation by stimulating collagen production but also promotes a youthful, radiant complexion, making it an invaluable tool for aesthetic treatments.

 **100% Electric cryotherapy**

Cryo Touch

Cryo Touch is an innovative device that uses advanced Thermal Shock Technology to deliver safe, non-invasive treatments for body contouring, skin tightening, and recovery. Equipped with two applicators (one for the body and one for the face), Cryo Touch offers precise, targeted therapies designed to:

- Reduce localized fat and cellulite
- Tighten and firm the skin
- Improve facial and body contours
- Stimulate natural collagen production
- Accelerate muscle recovery and reduce inflammation

How it works?

The treatment alternates between **cold therapy (down to -18°C)** and **heat therapy (up to +45°C)**. This rapid change in temperature creates a thermal shock effect, triggering natural fat cell apoptosis. The destroyed fat cells are then naturally eliminated through the lymphatic system. At the same time, the skin is stimulated to improve microcirculation, boost metabolism, and enhance natural rejuvenation processes.
